## GULF EUROCOOL

Gulf Eurocool is a superior quality, single phase, mono-ethylene glycol based product. It is a low silicate, all-purpose coolant designed for use in both heavy-duty diesel and automotive use, particularly those containing Aluminum alloys. Gulf Eurocool is NAP free (Nitrites, Amines and Phosphates).

Gulf Eurocool meets the specification requirements of General Motors GM 1899M (GM 6038M), Chrysler MS 7170, SAE J 1034, ASTM D 4985, John Deere H24B1/24C1, Cummins 90T8-4, Ford EZE M-97B44-A, Detroit Diesel and a host of many other international specifications.

For optimum year-round protection against freezing, boiling and corrosion, a 50% Gulf Eurocool solution (1 part antifreeze to 1 part water) is recommended. For maximum protection against freezing in extremely cold areas, a 60% solution (3 parts antifreeze to 2 parts water) can be used.

Typical Properties	30%	50%	100%
Equilibrium Boiling Point, undiluted, °C	108	114	160
PH,	9.30	9.52	-
Reserve alkalinity, mL	4.1	6.4	14.0
Silicate content, as Na <sub>2</sub> SiO <sub>3</sub> , m%	0.09	0.09	0.09
PH, 30 vol.% solution in water	-	-	9.60
